CALL'S NURSERIES

Offer You Over A Half Century of Practical Experience

The picture you see here is that of our founder, S. W. Call. From a humble beginning of one and one-half acres of fruit trees, Mr. Call started a business that has grown to 220 acres of Fruit Trees, Ornamental Trees, Evergreens, Roses, etc.

Call's Nurseries has been in continuous operation since its founding. During the 61 years this nursery has acquired a "character", which surely marks its business relations with its customers.

We feel safe in trusting to an introduction by old customers but expect that new customers will have to be "shown". This very thing we are willing and eager to do. Should you desire any information not covered by our catalog, please feel free to write us. We shall be pleased to give you advice or help you select varieties of Fruit or Trees and Shrubs for beautifying your home grounds. We are interested in every tree we sell for upon their success depends our success. Our oldest customers are our warmest friends.

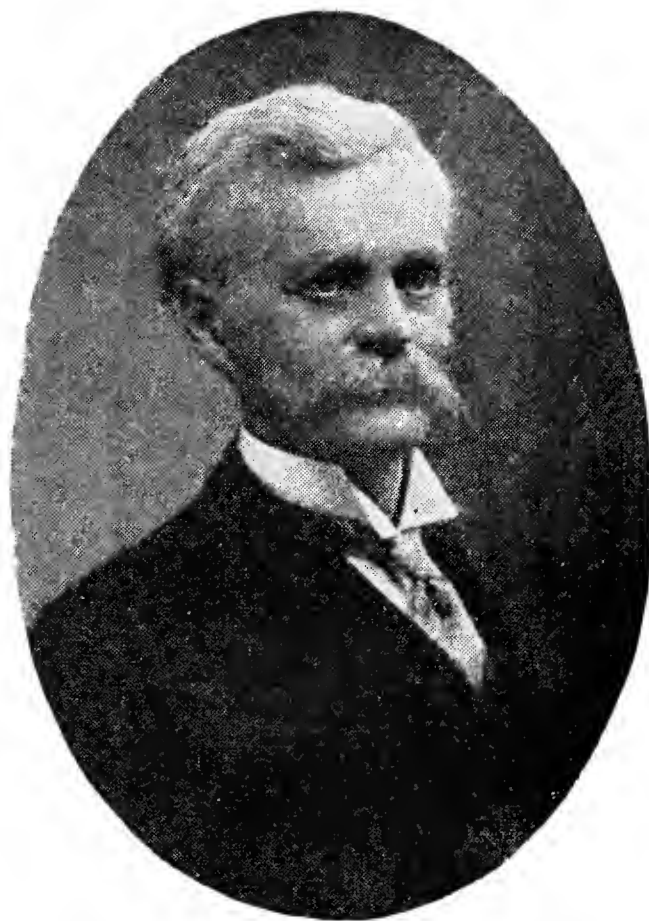

It is our aim to give individual service on each order we receive. We have expert field men who know how to select trees and plants that will please you.

We have worked long and hard for a good reputation among our customers and friends. We have kept faith with them for 61 years. May we serve you?

OUR SERVICES AND CUSTOMS Read Before Ordering

POLICIES—In our transaction of business with you a great desire for mutual satisfaction prevails. In order to make clear our customs we have endeavored in the paragraphs following to inform you of them so that there will be no misunderstanding.

OUR RESPONSIBILITY—We exercise the greatest care and give our personal attention to cutting buds and scions and packing orders. With all precaution mistakes and errors sometimes creep in. We guarantee any plant, tree or shrub we send out to be alive and in growing condition and true to name. We pack stock so that it will carry any distance. It may be on the road two or three weeks or longer and not suffer to any extent. We hold ourselves in readiness at all times to replace on proper proof any tree, plant, or shrub that may prove untrue to name or that arrives in damaged condition. It is also mutually agreed between ourselves and purchaser that our guarantee shall in no case make us liable for any sum greater than that originally paid for the trees, plants, or shrubs that are unsatisfactory for any of the reasons stated above.

SUBSTITUTION—Occasionally we find ourselves out of a certain variety. In such cases we always send the nearest match in color and season unless you instruct when placing your order to make *no substitution*.

TO AVOID ERRORS—Write your name, post office and shipping address very plainly. If possible send your orders early. First orders as far as practicable will be sent first. We usually commence shipping in the spring about the first of April and in the fall about October 15th.

PRICES—Our prices are for stock well packed f. o. b. Perry, Ohio. The expense of packing a small order is nearly as much as a large one, hence we prefer not to accept an order for less than \$1.00.

TERMS—We expect cash with orders. In ordering goods to be sent C. O. D., one-quarter of the bill must accompany order. Planters requiring a large quantity of stock need not send all the money with the order. You can send enough to secure the order and the balance any time before shipment.

NOTICE—Due to the low prices contained in this catalogue for first class merchandise, we are unable to prepay any transportation charges, other than small packages that it is possible to send via Parcel Post. Do not be misled by other firms who offer to pay shipping charges, but at the same time raise the price of their merchandise enough to more than offset it. Our prices are rock bottom.

CALL'S GUARANTEE

WE GUARANTEE every plant, tree or shrub which appears in this catalog to be just as represented. That they will be true to name and free from disease. We guarantee further that they will reach you in perfect growing condition. In fact, we give you every protection.

NEW SHRUBS

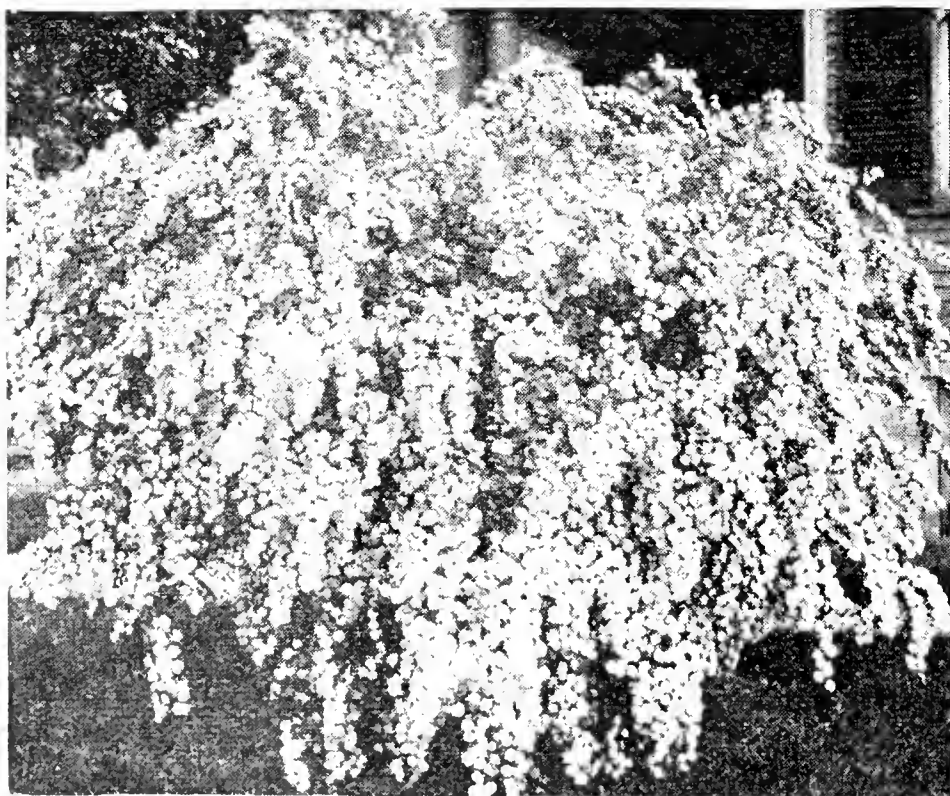

OUTSTANDING - UNUSUAL DIFFERENT

Oak Leaf Hydrangea

FRAGRANT VIBURNUM CARLESI

A truly wonderful new medium sized shrub. Highly prized for its delicate spice scented flowers of waxy pink in bud form, opening to pure white. Very lasting, and thrives under all conditions. Attractive when used as border or foreground planting. 1½ to 2 ft., \$1.50 ea.

Korean Spirea

OAK LEAF HYDRANGEA

The most striking shrub for lawn, or mass planting. Outstandingly different from any of the other hydrangeas. Leaves identical to those on an Oak tree, but plant does not grow over three feet high. Produces beautiful Hydrangea like flowers. This new and outstanding shrub should be included in your planting. 1½ to 2 ft. 60c ea.

Viburnum Carlesi

KOREAN SPIREA

Handsome new shrub, acclaimed the best of all the Spireas. Four to six feet tall when matured, forming a big dome shaped bush covered with blossoms of snowy white flowers in clusters. Very hardy and is most attractive in habit of growth and foliage. Blooms two weeks earlier than Spirea Van Houttei.

2 to 3 ft. 35c ea. 6 for \$1.98
3 to 4 ft. 45c ea. 6 for \$2.49

CALL'S SELECTED SHRUBS

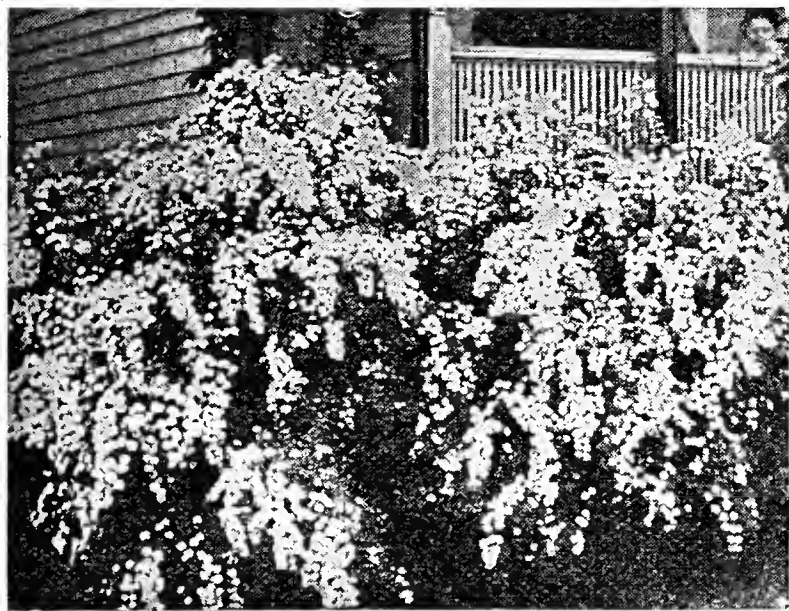

PEARL BUSH (*Exochorda Grandiflora*)—Attains a height of six to ten feet at maturity, and can be trimmed to any desired shape, vigorous grower. Buds resemble pearls, flowers of gleaming white sprays. 3 to 4 ft. 50c ea.

SILVER BELL (*Halesia Tetraptera*)—Small tree like shrub with dark green leaves. Flowers resemble white or pinkish drooping bells, followed by wing seeds. 2 to 3 ft., 50c ea.

SPIREA ANTHONY WATERER — Dwarf, free flowering shrub with upright branches growing about two feet tall. Brilliant rosy crimson corymbs at tips of branches. Excellent for foundation or border. 15 to 18 in., 35c ea.; 3 for \$1.00.

Spirea Anthony Waterer

BRIDAL WREATH SPIREA

Very graceful growing shrub with long drooping sprays, thickly studded with handsome pure white flowers. Blooms in May and June completely covering the entire bush with flowers. Very hardy, and grows to six feet in height. 2 to 3 ft. 25c ea.; 3 to 4 ft. 35c ea.; 3 for \$1.00.

SPIREA OPULIFOLIA AUREA — Upright growing, producing heavy clusters of white flowers giving bush a drooping effect. New foliage of bright yellow, changing to bronze in fall. 3 to 4 ft. 45c ea.

RED SNOWBERRY (*Coralberry*)—Blooms in July and August with flowers of deep red, followed by clusters of red berries weighting down branches to give drooping effect.

WHITE SNOWBERRY—Similar to the Red Snowberry in habit of growth, but produces pink flowers followed by large clusters of milk white seeds which remain until after heavy frost. Ideal for shady spots.

Snowberry

BOTH ABOVE: 2 to 3 ft., 40c ea.; 3 for \$1.10.

15 to 18 in.	\$1.25	\$11.00
18 to 24 in.	1.70	15.00

SCREEN or BACKGROUND HEDGES

We consider this to be one of the best plants for hedging, whether you wish a medium or tall untrimmed flowering hedge or a low trimmed hedge. When trimmed it is dense and bushy hugging the ground closely. Very hardy and easy to grow in sun or partial shade. When blooming it produces a snowy white mass effect. For natural untrimmed hedge, plant two feet apart; for trimmed hedge plant one foot apart.

ROSES

AMERICAN BEAUTY—Large flowers of beautiful carmine. Extremely fragrant. The most popular rose for a generation.

BETTY UPRICHARD—Semi-double salmon pink flowers, stained with copper. Blooms profusely; excellent for cutting.

BRIARCLIFF—Lovely pointed buds of bright clear rose pink. Healthy, vigorous growth.

COLUMBIA—Large double flowers of clear pink. Blooms throughout the summer profusely.

C. K. DOUGLAS—A fine crimson scarlet rose. Plant grows to medium height, blooming through the entire season.

DAME EDITH HELEN—Pure pink both in bud and full bloom. Highly scented, and never fades. A prize winning variety.

ETOILE DE FRANCE—One of the most charming red velvety roses. Produced on long stems. Very fragrant.

ETOILE DE HOLLANDE—Fragrant, free blooming, well formed, on long stems. Flowers velvety scarlet, and a most popular garden variety.

FRAU KARL DRUSCHKI—Finest of the white June roses. Large billowy white blossoms. Very fragrant, vigorous grower.

GRUSS AN TEPLITZ—Vivid cherry red, fine bronze foliage, free blooming throughout the summer. Makes a large bushy plant.

HADLEY—Exceptionally bright crimson flower staying in bud form longer than most other varieties. Long stems, fine for cutting.

J. L. MOCK—Bright rich pink, large gigantic flowers opening to full cup-shape flowers. Numerous petals giving it a peony effect.

American Beauty

K. A. VICTORIA—Snowy white with faint yellow about the base of the buds. Vigorous grower, and deliciously fragrant.

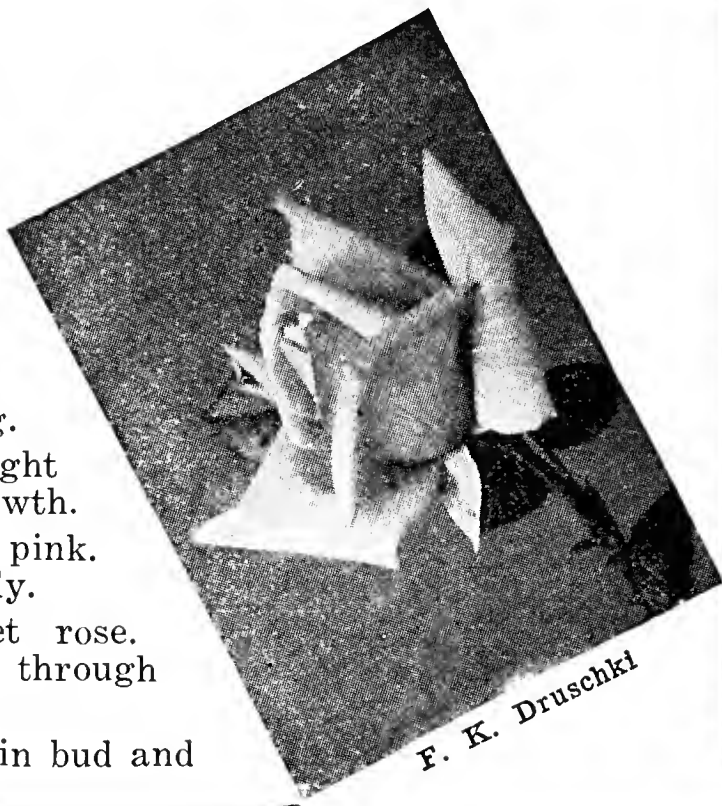

LADY HILLINGDON—Rich apricot yellow buds opening to a pale yellow tinged with pink.

ROSES

KILLARNEY PINK—Blooms of flesh color suffused with pale pink on long stems. Very fragrant, valuable for cutting.

KILLARNEY WHITE — Similar to pink variety having the same habit of growth except for the color of flower being white.

MADAME BUTTERFLY — Bright, light pink shaded with gold. Rich Indian red with gold at base in bud form. Highly scented.

PINK RADIANCE — Lovely light silver pink flower. Very fragrant and healthy grower. Blooms throughout the entire summer.

PRESIDENT HOOVER—Orange and pink in bud form opening to vivid cerise-pink flamed with yellow. A strong vigorous grower, and one of the best varieties.

RED RADIANCE—Large globe shaped flower with even shade of clear red changing to deep rose. An exceptionally good bloomer with true rose fragrance.

SOUV. DE CLAUDIUS PERNET—Long pointed buds that open to large sunflower blooms. Retains its color throughout growth. Bush erect and vigorous. One of the best yellow varieties.

TALISMAN—The most vividly colored rose, and the most easy to grow. Free from disease, rapid grower, and free blooming. Base of the petals are golden yellow shading to coral and bright red at the tips. Very fragrant.

CLIMBERS

Especially adapted to arbors, walls, or trellises, offering an opportunity to glorify the home with rich blankets of various colors. Healthy, vigorous climbing roses produce fully formed blooms in rich and endless color and variety.

AMERICAN BEAUTY—One of the best climbers, color of deep rose pink. Sweet scented and large; of splendid form.

DR. VAN FLEET—Long pointed buds of flesh pink color, deepening to rosy flesh in center. Early and borne on stems from twelve to eighteen inches long. Splendid cutting variety.

PAUL'S SCARLET—Unquestionably the most popular climbing rose. Flowers of the most vivid scarlet. Large and borne in clusters. Retains color until finished blooming. One plant will resemble a scarlet mass.

Oak

Sycamore

PIN OAK—Almost pyramidal in habit, with dark lustrous leaves. Very sturdy and long lived. Leaves dark green turning to deep red and bronze in fall. 6 to 8 ft. \$1.50 ea.; 8 to 10 ft. \$1.95 ea.

RED OAK—Large tree, with unusually large leaf. Very quick growing. Highly colored leaves in fall. 6 to 8 ft. \$2.50 ea.; 8 to 10 ft. \$3.00 ea.

POPLAR

CAROLINA—Vigorous native tree of spreading form and rapid growth, large glossy leaves. Valuable for quick shade. 6 to 8 ft. 70c ea.; 8 to 10 ft. \$1.00 ea.

LOMBARDY—Remarkable for its picturesque, tall, spike-like form. Useful in landscaping effects; for planting along drives or near a building. 6 to 8 ft. 75c ea.; 8 to 10 ft. \$1.10 ea.

SILVER (Bolleana)—Useful in breaking the monotony of low round top trees. Leaves of glossy green, silvery beneath. Tall growing. 6 to 8 ft. \$1.75 ea.; 8 to 10 ft. \$2.25 ea.

SYCAMORE, European (Oriental Plane)—Erect growing, wide spreading tree. Bright green, 3 pointed leaves, of large size. Extensively used for park and street planting as well as for shading the lawn. 6 to 8 ft. \$1.50 ea.; 8 to 10 ft. \$1.75 ea.

TULIP TREE (Liriodendron)—Of tall pyramidal growth, with broad glossy, fiddle-shaped leaves, of bluish green turning to bright yellow in the fall. Tulip-like flowers. 5 to 6 ft. \$1.25 ea.; 6 to 8 ft. \$1.75 ea.

WISCONSIN WEEPING WILLOW—Forms a large graceful weeping tree. Its fresh bright green tint and long wavy branches make it one of the most attractive trees. 6 to 8 ft. \$1.50 ea.; 8 to 10 ft. \$2.00 ea.

Poplar

PLAN TO PLANT ANOTHER TREE

FLOWERING THORNS (Hawthorne)

CRUS GALI—Wide, horizontal branches, flat topped effect. Flowers white, tinged with red.

3 to 4 ft. \$1.50 ea.

4 to 5 ft. \$2.00 ea.

OXYCANTHA — Single white flowers appearing when leaves are full grown. Scarlet fruit.

3 to 4 ft. 85c ea.

4 to 5 ft. \$1.00 ea.

PAUL'S SCARLET — Beautiful double flowers of deep crimson. Showy fruits.

3 to 4 ft. \$1.50 ea.

4 to 5 ft. \$2.00 ea.

EVERGREENS

THE ARBOR VITAE

Pyramidal A. V.

AMERICAN—Pyramidal in shape, with soft green foliage in summer, changing to dark green in autumn. Rapid grower, fine for screens. 2 to 3 ft. \$1.00 ea.; 3 to 4 ft. \$1.50 ea.; 4 to 5 ft. \$1.85 ea.

DOUGLAS GOLDEN—Very hardy, broad and bushy, with slender branches of bright green mixed with yellow. Very ornamental. 2 to 3 ft. \$1.75 ea.; 3 to 4 ft. \$2.25 ea.

ELLWANGER (Tom Thumb) — A low broad form of evergreen with slender branches and feathery foliage. 18 to 24 inches \$1.25 ea.

GIANT (Giganta)—A very compact growing evergreen of pyramidal habit. Very hardy, keeping its green foliage all through the year. 18 to 24 in. \$1.00 ea.; 2 to 3 ft. \$1.50 ea.

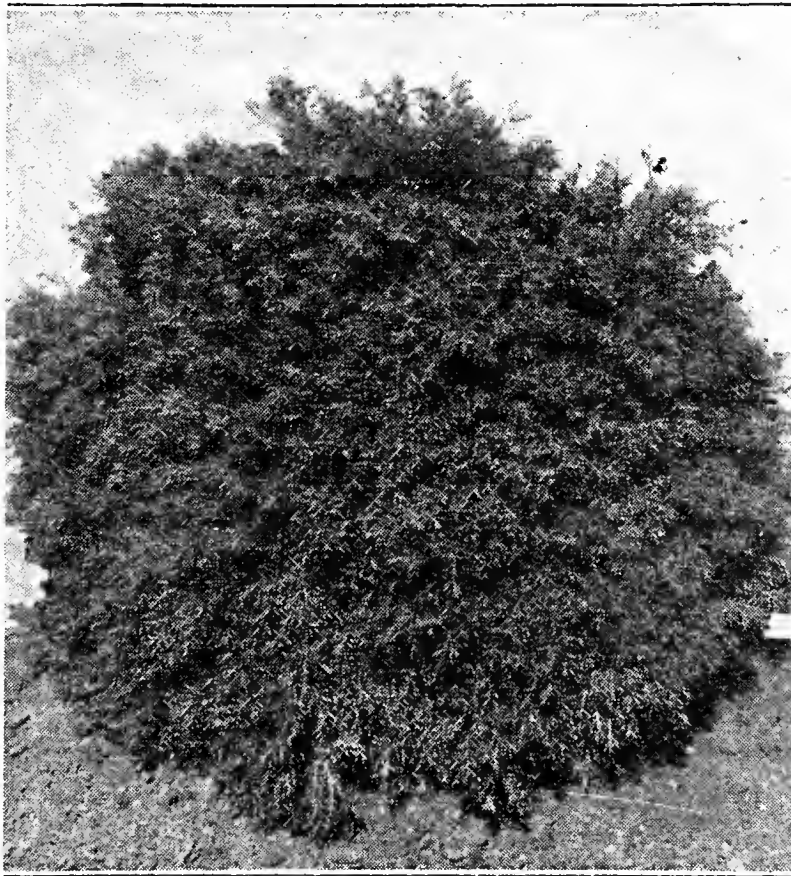

GOLDEN (Occidentalis Aurea)—Compact, pyramidal plant; golden green foliage; dependable, hardy and vigorous in growth. 3 to 4 ft. \$2.50 ea.

GLOBE—Natural compact, globe shaped, dark green foliage. The ideal low-growing evergreen for massing against the taller evergreens in foundation planting. 15 to 18 in. \$1.00 ea.; 18 to 24 in. \$1.25 ea.

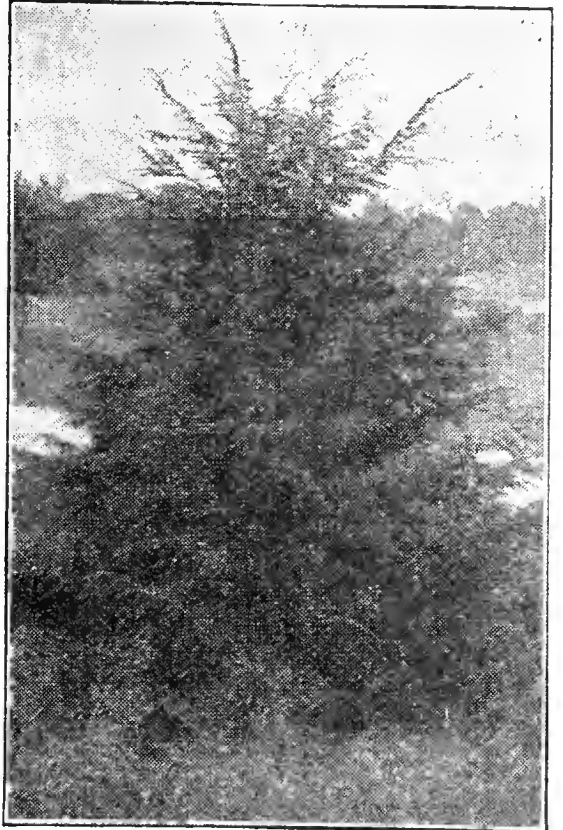

MONUMENTALIS—Very beautiful specimen. Foliage of bright green. One of the outstanding varieties of the Arbor Vitae family. 18 to 24 in. \$1.00 ea.; 2 to 3 ft. \$1.50 ea.

ORIENTALIS (Chinese)—Comparatively low, broad, pyramidal tree. Foliage of yellowish green, dulling to a bronze green in winter. 2 to 3 ft. \$1.25 ea.; 3 to 4 ft. \$1.75 ea.

PYRAMIDAL — Most compact and erect, foliage of deep green retaining its full color the year round. Grows close and compact, naturally pyramidal. 2 to 3 ft. \$1.60 ea.; 3 to 4 ft. \$2.00 ea.

Globe Arbor Vitae

Hemlock

FIR

CONCOLOR — Very picturesque with long leathery needles of bluish tinge. Upright in form. 18 to 24 in. \$2.00 ea.

DOUGLAS — Resembles a Blue Spruce, and is one of the finest of the evergreen group. Leaves of light green above, blue underneath. Conical form. 3 to 4 ft. \$2.75 ea.

VEITCHI—Upright in growth. foliage of light green, branches horizontal. 18 to 24 in. \$2.00 ea.

HEMLOCK

CANADIAN—One of the finest of evergreens, adapted to shady conditions. Lace-like foliage of dark lustrous green. Produces a beautiful contrast when grouped with other varieties. 18 to 24 in. \$1.40 ea.; 2 to 3 ft. \$2.00 ea.

HOW TO PLANT EVERGREENS

In planting evergreens, dig a hole large enough to take in all the roots and the ball of earth. After planting soak the ground around the tree thoroughly with water, and apply covering of good strong manure to retain the moisture. Care should be taken to keep the roots from drying out from exposure to the air.

EVERGREENS FOR BEAUTY AND DIGNITY

JUNIPER

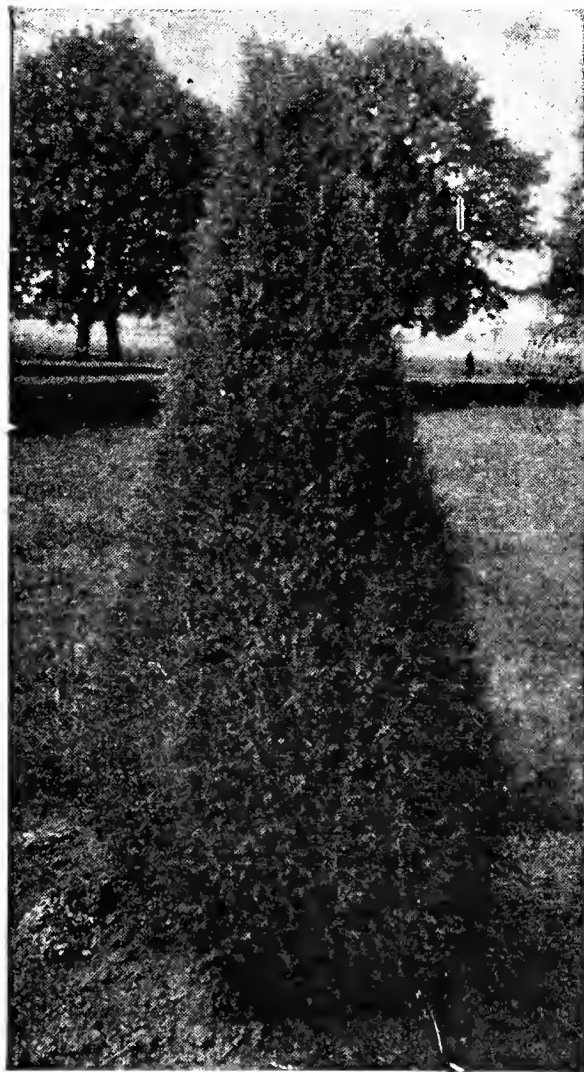

CANNARTI—A new improved type, with yellowish bronze foliage of feathery texture. Branches drooping. 3 to 4 ft. \$4.00 ea.

COLUMNARIS—Tall growing tree of pyramidal shape, perpendicular sides, forming a broad compact tree. Very desirable for informal effect. 4 to 5 ft. \$5.00 ea.; 5 to 6 ft. \$6.50 ea.

DEPRESSA PLUMOSA — A low spreading Juniper of an unusually good color. During spring and summer it is bright green, turning to a rich purple-bronze in the fall. 24 to 30 in. spread \$3.25 ea.

Pfitzer

Irish Juniper

liage light green and feathery. 2 to 3 ft. \$3.00 ea.

VIRGINIANA (Red Cedar)—Fine, dense foliage, of columnar form, varying sometimes in color; usually deep green, turning to bronze. 2 to 3 ft. \$1.65 ea.; 3 to 4 ft. \$2.75 ea.; 4 to 5 ft. \$4.25 ea.

VIRGINIANA GLAUCA (Blue Cedar)—Compact, conical habit with beautiful glaucous-blue foliage, making it one of the choice varieties. Very contrasting in group plantings. 2 to 3 ft. \$2.75 ea.; 3 to 4 ft. \$3.50 ea.

IRISH—Erect, slender and formal in habit of growth. Foliage sage green, very compact, making a slender column. Used in corner of planting and in cemeteries. 2 to 3 ft. \$1.75 ea.; 3 to 4 ft. \$2.50 ea.

PFITZER—One of the most striking of all evergreens. Branches at 45 degree angle, making a fine, low growing filler. Foliage very dark green, thickly studded with silver beads. 15 to 18 in. \$1.75 ea.; 18 to 24 in. \$2.25 ea.

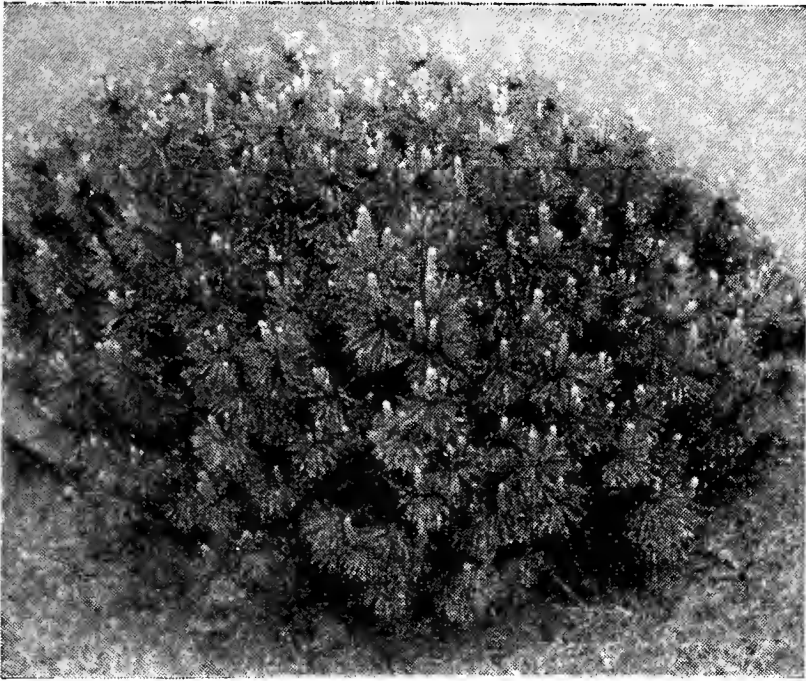

SAVIN—Useful for all low plantings, or as a filler in evergreen groups. Numerous short branches of trailing habit. Bright steel blue color. 15 to 18 in. \$1.50 ea.; 18 to 24 in. \$2.00 ea.

SWEDISH — Similar to Irish Juniper in texture but more bushy. One of the hardiest and most reliable pillar type. Foliage dense, with drooping tips. 3 to 4 ft. \$2.50 ea.; 4 to 5 ft. \$3.25 ea.

SCHOTTI — A fine hardy evergreen of columnar habit; foliage light green and feathery. 2 to 3 ft. \$3.00 ea.

Swedish Juniper

Mugo Pine

PINE

AUSTRIAN—Tree remarkably hardy and spreading; leaves long, stiff and dark green. Rapid growing, and evenly branched. New growth erect and silvery. Will withstand wind, smoke, and gas. 4 to 5 ft. \$3.50 ea.; 5 to 6 ft. \$4.50 ea.

MUGHO—Dwarf, low growing type of pine. Leaves dark green, short and stiff. Popular in foundation plantings. 12 to 15 in. \$1.00 ea.; 15 to 18 in. \$1.45 ea.

SCOTCH—Similar to Austrian in habit of growth. Needles are somewhat softer, and light green. Reddish brown bark, branches producing cones. Quick growing. 4 to 5 ft. \$3.50 ea.; 5 to 6 ft. \$4.50 ea.

RETINOSPORA—Cypress

PLUMOSA—A handsome evergreen with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings. Can be kept trimmed to any desired height. 2 to 3 ft. \$2.00 ea.; 3 to 4 ft. \$2.35 ea.

PLUMOSA AUREA—Golden yellow throughout the summer; compact habit of growth, similar to above except for color. Beautiful in group plantings. 2 to 3 ft. \$2.00 ea.; 3 to 4 ft. \$2.35 ea.

SUAROSA VEITCHI — Foliage feathery-blue and silver, grows dense giving it a soft wooly appearance. Broad pyramidal outline, can be trimmed. 2 to 3 ft. \$2.50 ea.; 3 to 4 ft. \$3.25 ea.

Austrian Pine

SPRUCE

BLACK HILLS—Growth upright and conical, retaining its branches well to the ground. Compact, slow growing tree. Foliage of gray, bluish green. 2 to 3 ft. \$2.00 ea.; 3 to 4 ft. \$3.00 ea.

COLORADO BLUE—Genuine, real true blue, of upright growth, yielding foliage of deep glaucous blue. The most beautiful of all evergreens. 18 to 24 in. \$2.00 ea.; 2 to 3 ft. \$2.75 ea.

COLORADO GREEN—Regularly branched, very symmetrical, of pyramidal habit. Rigid needle pointed leaves of silvery blue green. Identical to Colorado Blue, except for greenish colored foliage. 18 to 24 in. \$1.25 ea.; 2 to 3 ft. \$1.75 ea.

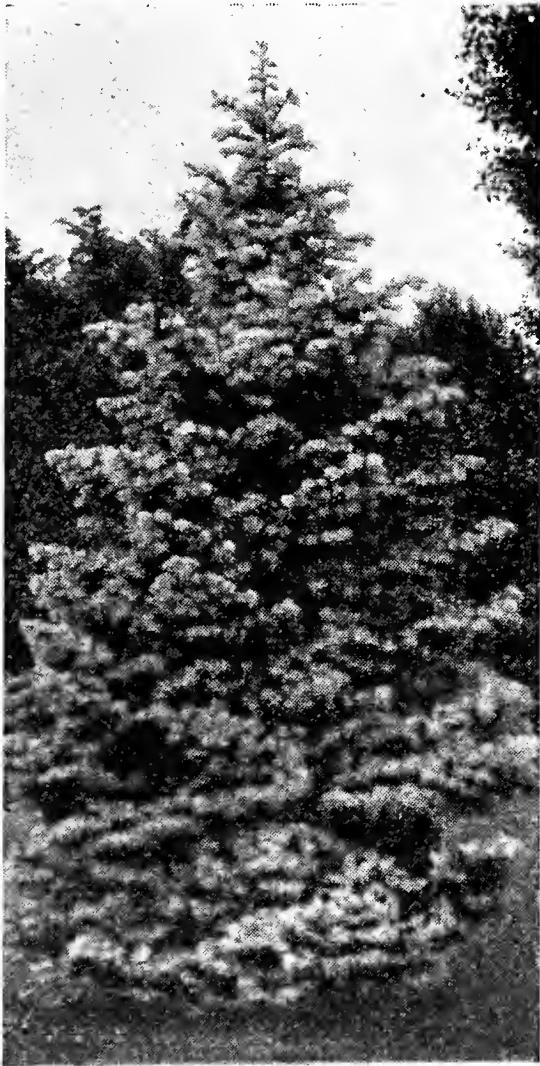

KOSTERS BLUE—The aristocrat of the Evergreen family; uniformly developed, broad and pyramidal. Its color is of the truest and most beautiful blue to be found in any tree. 18 to 24 inch \$3.50 ea.

NORWAY—A tall and grand tree of rapid growth; widely used for windbreaks (see page 11) or lawn planting. Exceedingly picturesque. 18 to 24 in. 70c ea.; 2 to 3 ft. \$1.00.

WHITE—One of the best conifers, especially adapted to cold climates. Compact, upright, long-lived, retaining its branches to the ground. Varies in color from light green to glaucous blue. 2 to 3 ft. \$1.25 ea.; 3 to 4 ft. \$1.75 ea.

Planting of Colorado Blue Spruce, Pfitzer and Pyramidal A. V.

Black Hills Spruce

EVERGREEN TAXUS (YEW)

CUSPIDATA (Spreading)—Half upright, and irregular in habit. Waxy, black-green needles which thickly cover the branches. 15-18 in. \$2.00 ea.; 18-24 in. \$2.75.

CUSPIDATA BREVIFOLIA (English)—Dwarf, compact, with short, rich, dark green leaves, dense bushy habit. Hardy, and slow growing, one of the best. 15 to 18 in. \$2.75 ea.; 18 to 24 in. \$3.50 ea.

CAPITATA—Beautiful upright Yew of moderate bushy growth; branches upright and slightly spreading. Foliage of dull green and short. 15 to 18 in. \$2.00 ea.; 18 to 24 in. \$2.75 ea.

Taxus Capitata

BALDWIN—Best known variety; large, bright red. Excellent producer. Keeps well; good market variety.

CORTLAND—Deep red, one of the finest and best keepers. Unsurpassed for market. Very prolific; excellent taste.

DELICIOUS RED—Newer variety, large, dark red; flesh white, rich and juicy. Good keeper, annual bearer.

FAMEUSE—Snow apple. Fruit of medium size; flesh snow white, juicy and tasty. Ships and keeps well. Striped color.

GALLIA BEAUTY—Fruit large, smooth, uniform in size and shape. Thick skinned making it a good shipping variety. Solid red.

GRIMES GOLDEN—Medium, yellow. Very productive, good keeper. Flesh yellow, firm, crisp.

JONATHAN—Medium red; flesh white, tender, juicy, and rich. One of the best for table and market.

MAIDEN BLUSH—Medium, pale yellow, deep red cheek. Excellent for home use. Very productive.

McINTOSH—Large, deep crimson color; flesh snow white, juicy, crisp. Good sort for market and home use.

MELBA—An early apple of high quality, similar in appearance and quality to McIntosh. Fine seller on roadside market.

NORTHERN SPY—Very large, striped; tender, extra rich flavor. One of the best for eating and good for marketing.

RED ASTRACHAN—Early apple, medium sized; deep crimson color; extra good quality, rich flavor.

RHODE ISLAND GREENING—Large, greenish yellow; tender, crisp and juicy; best for cooking.

STAYMAN'S WINESAP—Best bearer and excellent marketing variety; medium size, deep red, juicy and crisp, bears young.

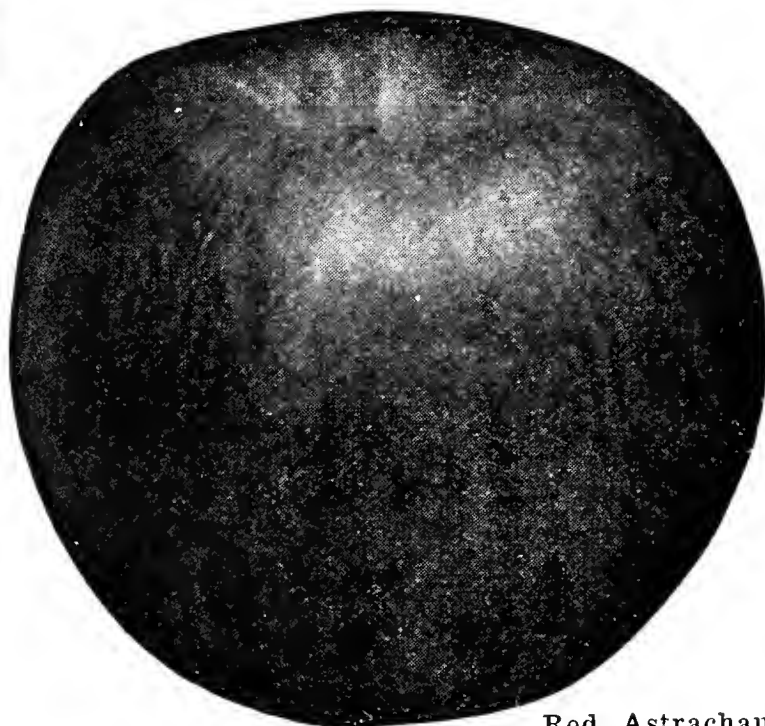

TURLEY WINESAP—Fruit dark red and large. Bears just before the Stayman's.

WAGNER—Medium, pinkish red striped with carmine over pale yellow; flesh white, fine grained, tender and very juicy.

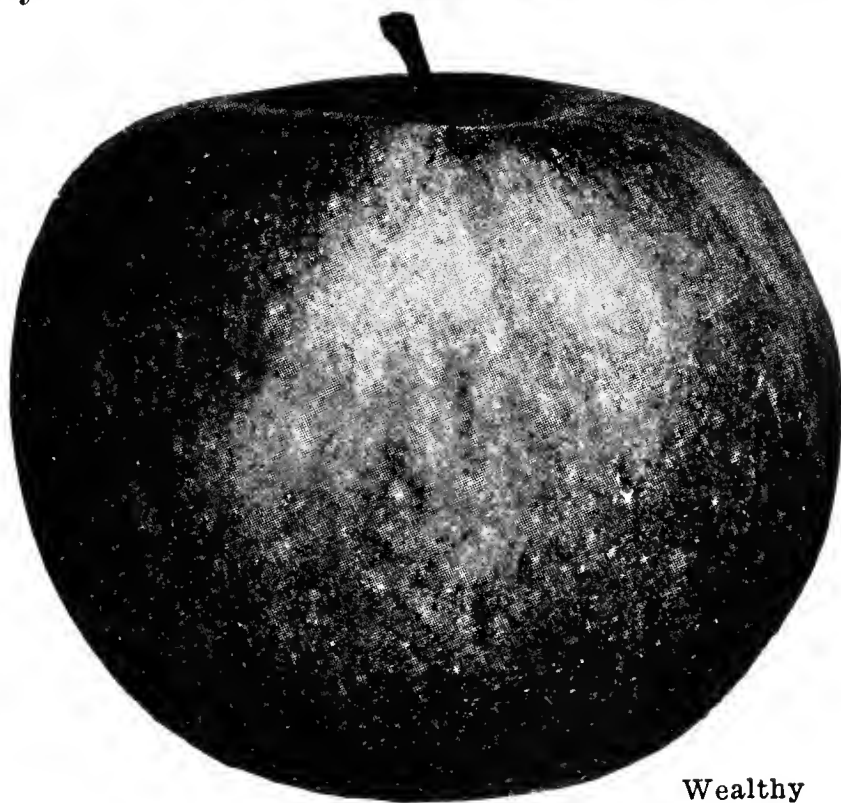

WEALTHY—Deep red, flesh white, very juicy. Medium to large, smooth and round. High quality.

WINTER BANANA—Skin smooth, moderately thick, waxy, pale yellow. Flesh white tinged with yellow.

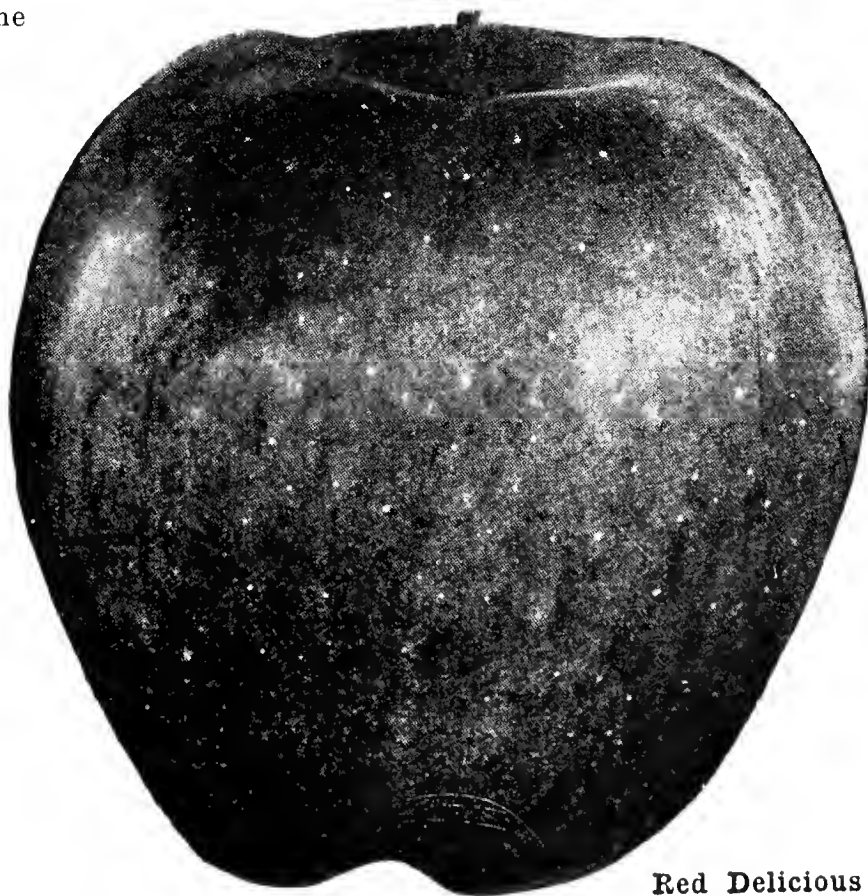

YELLOW DELICIOUS—Similar to Red Delicious except for color; rich yellow, sweet, very juicy.

NUMBER OF TREES TO AN ACRE	
30 feet apart each way	50
20 feet apart each way	110
18 feet apart each way	135
16 feet apart each way	170

8 feet apart each way	680
5 feet apart each way	1210
4 feet apart each way	1742
3 feet apart each way	2723
2 feet apart each way	4840

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant; which, divided into the number of feet in an acre (43,560) will give the number of trees to the acre.

CARE AFTER RECEIVING SHIPMENT

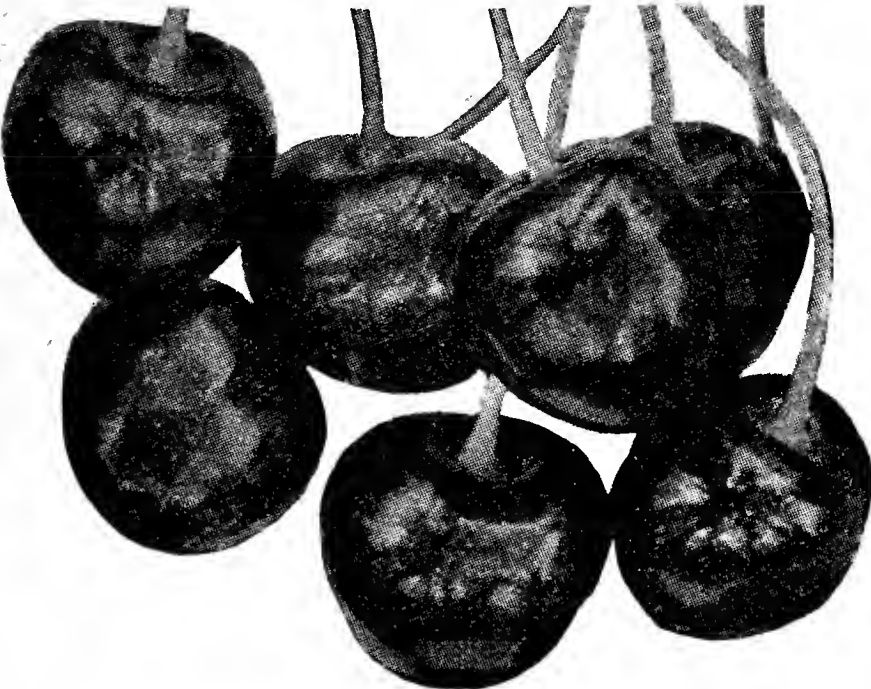

While we exercise the greatest of care in selecting only first grade plants and trees for our customers, and guarantee every plant or tree we sell, caution must be taken when your shipment arrives. In the event that you are unable to plant your order immediately, just dig a trench and heel in the plants, making sure that all roots are covered with dirt, water well. This will keep your order in good condition until such time as you are ready to plant permanently.

Don Byers HARDEE

U.S. PLANT PATENT N°120

TRADE MARK REG U S PAT OFF

OFFICIAL DESCRIPTION OF THE

HARDEE PEACH

The flowering time of the tree in Northern Ohio has ranged, for the last five years, between April 18th for the first bloom, and May 7th for the last bloom, it being in full blossom usually the last week in April. This variety has a larger and more showy bloom than Elberta, closely resembling Carman in this respect. The flower buds are pubescent, medium to large in size, medium to long, conic to obtuse, plump, and mostly appressed.

The fruit is a yellow freestone peach, having a thick skin, and in size, color, texture and juiciness of flesh, and general appearance resembling Elberta except that it has a more prominent tip, and that it is more elongated than Elberta or other known varieties of peaches ripening at about the same time. It is distinguishable from the Elberta by being less plump. The suture is pronounced, there is a tendency to bulge more on one side than the other, and the apex is decidedly pointed. The fruit is a deep yellow with a striking red cheek. Flesh yellow. Flavor is distinct with a very decided peach taste.

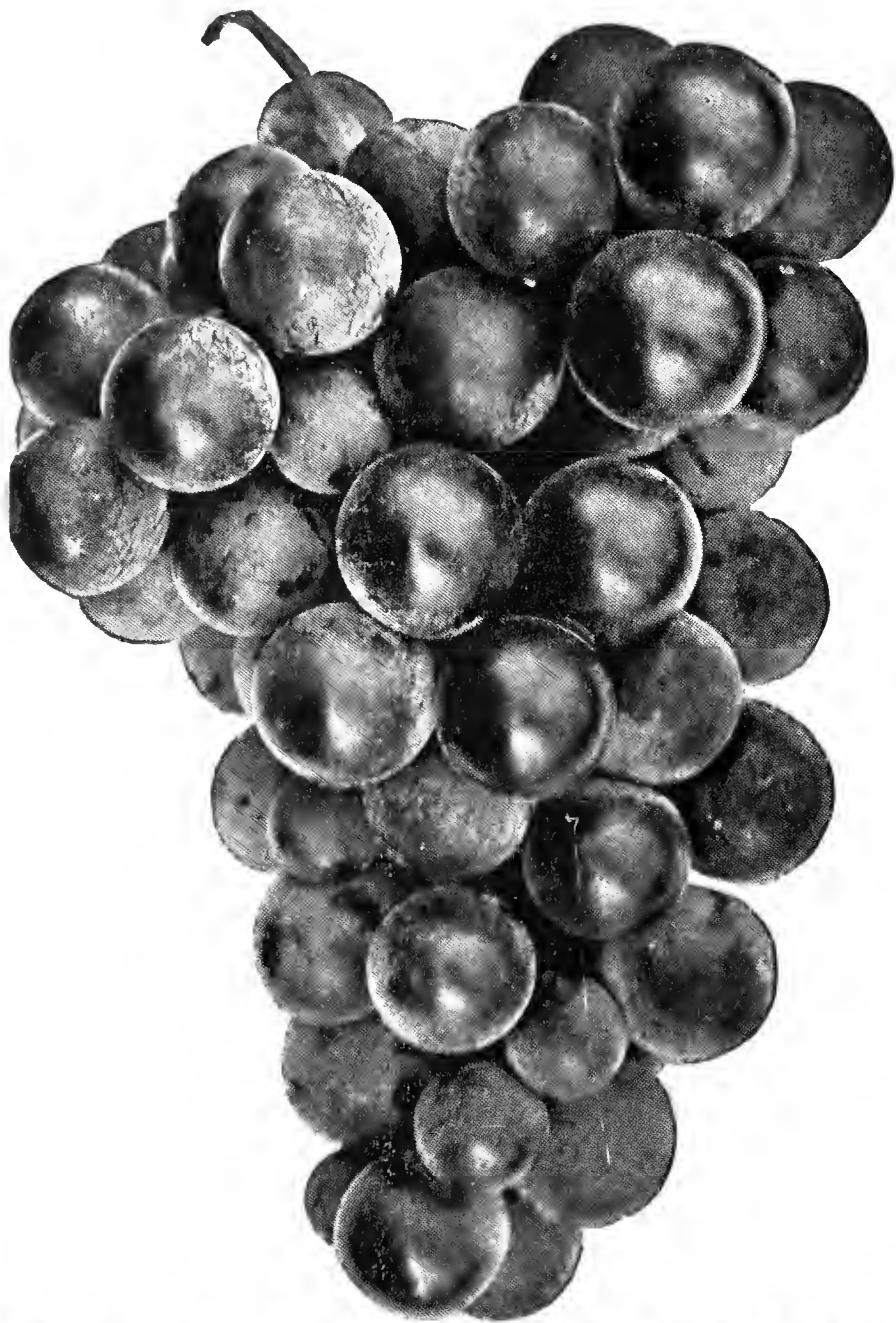

The fruit's shipping and keeping qualities are good. It is a good all purpose peach, having fine qualifications for dessert, cooking and canning. It is good for home use and it is also a good market peach.

A DELICIOUS HIGH QUALITY YELLOW FREESTONE PEACH WITH OUTSTANDING "BUD" AND "WOOD" HARDINESS.
